

EVIDENCE-BASED FORMULAS FOR SUPPORTING CANCER PATIENTS' NEEDS THROUGHOUT THEIR ONCOLOGY JOURNEY

Budtender Education
Oncorix, 2024

ABOUT ONCORIX

Our mission is to develop the optimal integrative formulas for supporting each cancer patient according to his or her needs throughout the oncology journey. We aim to provide the cancer patients and their healthcare providers with sufficient evidence to trust our solutions and to integrate them into the oncology treatment protocol in a comprehensive manner.

Our solutions are intended to meet the needs of the 50% of cancer patients in the US who currently use integrative products, such as cannabis and mushroom extracts, along with conventional cancer treatment.

Featuring a **direct-to-patient** marketing model, Oncorix supports and guides cancer patients through qualified oncology nurses.

“ Cancer patients are increasingly using cannabis and mushroom extracts in combination with conventional treatments. Oncorix’s unique products are designed to allow patients to easily integrate them into their treatment regimen. ”

Dr. Donald Abrams

Integrative Oncologist, UCSF

42%

Of **Breast Cancer** patients use Cannabis as an **Integrative Oncology treatment**.*

*According to a 2022 study on 600 breast cancer patients

<https://pubmed.ncbi.nlm.nih.gov/34636036/>

42% of Breast cancer patients reported using cannabis for relief of symptoms (pain, insomnia, anxiety, stress, and nausea/vomiting).

49% of cannabis users believed that medical cannabis could be used to treat cancer itself.

PRODUCT INFORMATION

- Oncorix' first product, BREAVIX, is a proprietary blend of rare-cannabinoids, Terpenes, and mushroom mixtures **designed specifically to support patients with breast cancer** during their oncology journey.
- The products were developed by a team of **top oncologists and scientists** over a period of 5 years and \$7 million.
- Preclinical studies showed solid results for the BREAVIX products, both alone and in combination with chemotherapy
 - An improvement of six-fold in the effectiveness of the chemotherapy
 - The combination of both cannabinoids and mushroom products produces a synergistic effect (much better than each product alone).

Note: Although BREAVIX was developed to support breast cancer patients, other cancer patients might also find it useful!

BREAVIX

Rare-Cannabinoids soft gels

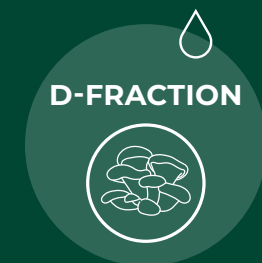

124mg of cannabinoids per capsule
Low THC (Only 2.5mg per capsule)

- Very high Cannabinoid concentrations (124mg per capsule).
- Low THC level (2.5mg per capsule) – Designed to avoid the unwanted 'high' effect.
- Contains high levels of rare cannabinoids (such as CBDV).
- We created our own entourage effect with our unique terpene mixture.
- For higher bioavailability, 'enteric coating' is used.
- Each package contains 120 capsules (monthly amount).
- It is recommended that patients consume 1-4 capsules per day (up to 500mg of cannabinoids per day).

BREAVIX

Mushroom Extracts Caplets

850mg of mushrooms per caplet

- Each capsule contains 850mg of functional mushroom extract.
- A unique blend of mushroom extracts:
 - **PSK** – extracted from Turkey tail mushroom. As an additive in cancer therapy in Asia, especially in Japan, this mushroom extract is one of the most commonly used medicinal mushrooms.
 - **D-Fraction** – extracted from maitake. It has been reported to exert an antitumor effect in lab trials by enhancing the immune system.
 - **Reishi Alcohol Extract and Spore Oil** – used by Asian doctors and naturopaths to support the immune system. Reishi extracts have shown promising anticancer and immunomodulatory properties in laboratory studies and preclinical trials.
- For higher bioavailability, 'enteric coating' is used.
- Each package contains 60 caplets (Monthly amount)
- It is recommended that patients consume 1-2 caplets per day.

BREAVIX

Combo Pack

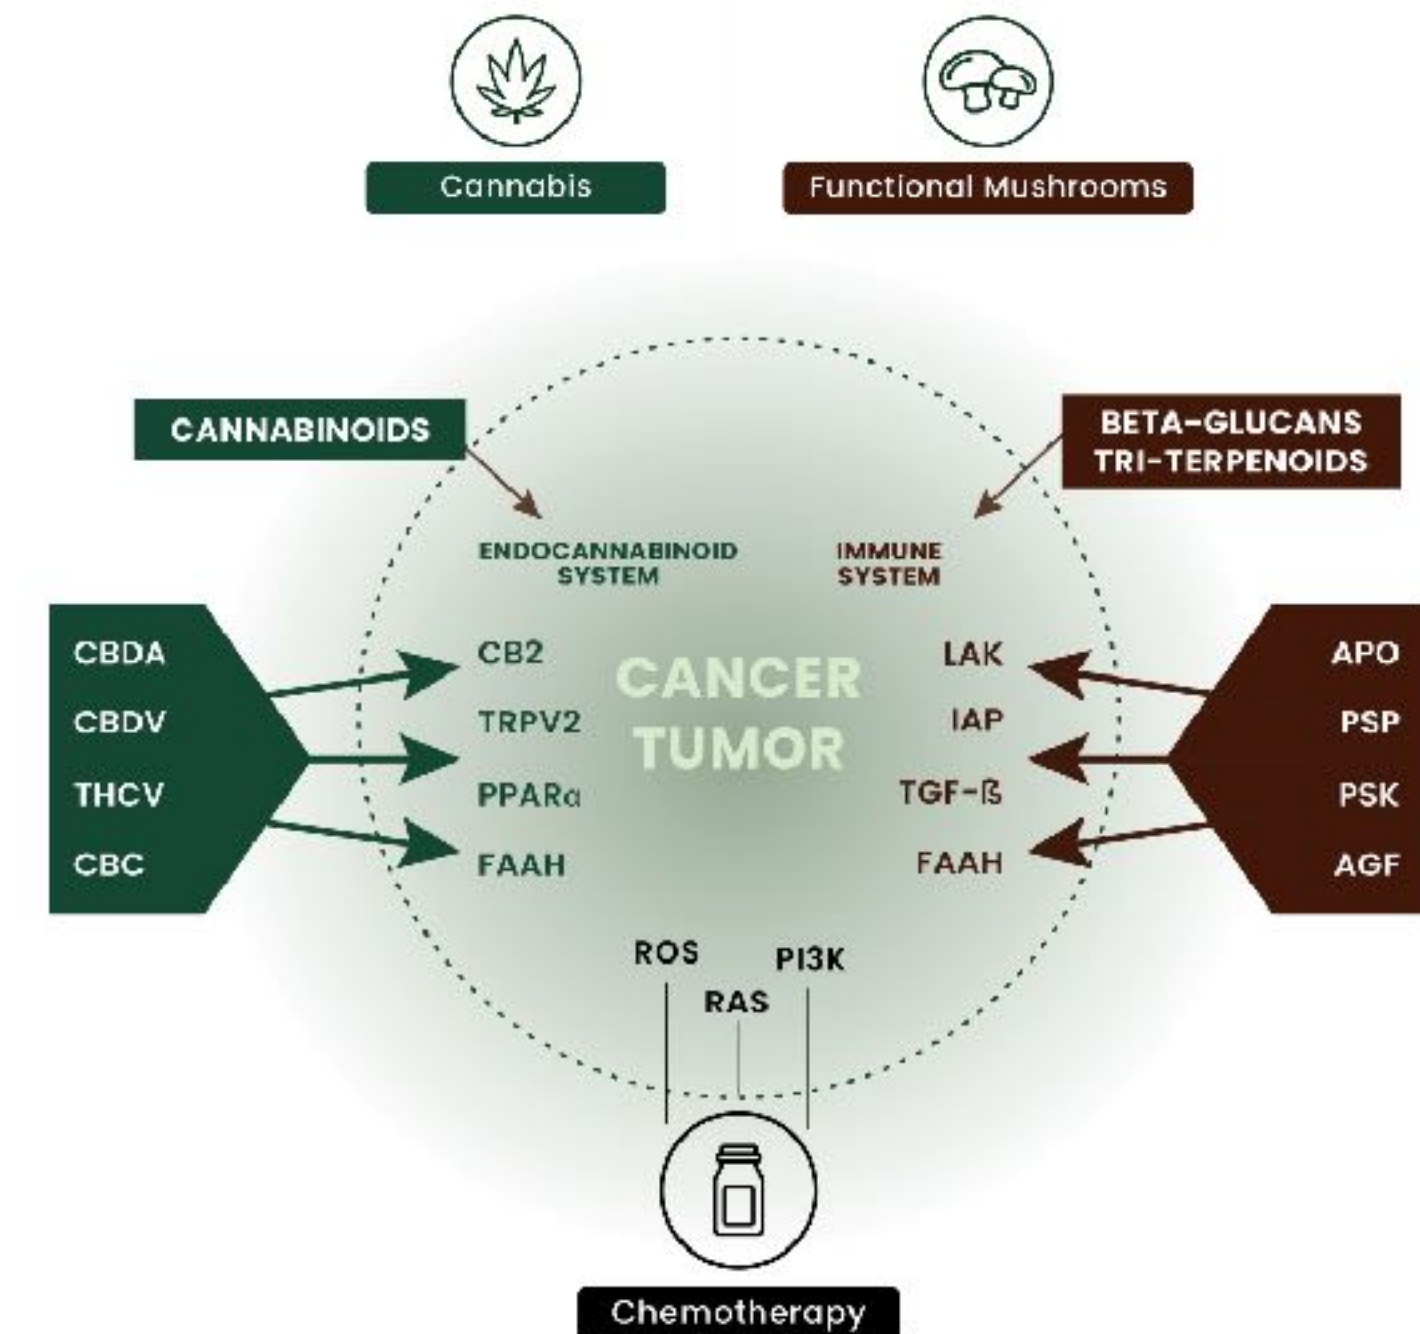

850mg of mushrooms per caplet

124mg of cannabinoids per capsule

- Providing optimal support to patients with breast cancer.
- One package with two products:
 - **BREAVIX** Rare-Cannabinoids Soft gel.
 - **BREAVIX** Functional Mushrooms & CBD Caplets.
- Both products are included in monthly amounts:
 - 120 Softgels (Consume 1-4 capsules per day).
 - 60 Caplets (Consume 1-2 caplets per day).
- Patients should use the products daily for six months.

SCIENCE

- Cannabinoids and functional mushrooms **both have beneficial effects** on the immune system.
- Oncorix **works in harmony with conventional cancer treatments** like chemotherapy.
- A **very high concentration of active ingredients** is found in Oncorix, as determined by our lab tests.

OUR SOLUTIONS ARE GROUNDED IN SCIENCE

Disclaimer: There is no systematic review that has been conducted to evaluate the actual benefits of these ingredients in cancer treatment.

“ Oncorix’s innovative products showed impressive results in an Ex-Vivo breast cancer lab model. Patients might also be able to benefit from the products as complementary to their conventional treatments. ”

SAFETY AND RESPONSIBLE CONSUMPTION

- It is extremely important to **take extra care** when integrating products into the treatment protocol of cancer patients.
- **"Start low and go slow"** is crucial! It is recommended that patients consume the products according to the directions on the package (start with 1 capsule per day, and increase to 4 capsules).
- Based on our trials, the best results are achieved when **both products are consumed together** (Soft gels and Caplets).
- Before using the products, patients should **consult their doctors**.
- Our oncology nurses **provide FREE support and guidance** to all of our patients.

FREE
CONSULTATION
WITH OUR
ONCOLOGY NURSE

- Supporting breast cancer patients during their oncology journey is our top priority.
- And it's one hell of a journey.
- As a result, we provide FREE guidance and support to patients and their families through our oncology nurses.
- Our oncology nurse should be proactive in communicating with the patients and ensuring they follow the protocol to achieve the best results.

“ A strong synergistic effect was demonstrated in our lab when Oncorix’s products were combined with chemotherapy. We are greatly encouraged by these results and will continue to seek more evidence for patients. **”**

Dr. Itzchak Angel

Oncorix’s Pharmacologist

Oncorix will launch more integrative oncology products in the near future to support patients who suffer from **colon, pancreatic, lung, and prostate cancer.**
